PROFESSIONAL EXPERIENCE

Atos — Plano, TX (Remote)

Software Developer | August 2019 – September 2026

- Developed front-end and back-end Java solutions for the Guidewire InsuranceNow platform, delivering features, enhancements, and fixes for enterprise insurance applications while leveraging AI tools such as Microsoft Copilot to accelerate delivery.
- Resolved inbound critical Production Support tickets, troubleshooting high-priority issues in live insurance systems.
- Authored 100+ JUnit tests targeting files with missing coverage, expanding automated test coverage across the codebase.
- Wrote, peer-reviewed, and executed numerous manual and automated test cases to validate application functionality.
- Investigated Jenkins build and automation bot failures daily, performing root-cause analysis to diagnose and resolve build issues.
- Developed and supported RPA bots in Automation Anywhere to automate business processes.
- Collaborated with developers, business analysts, and QA testers in an Agile/Scrum environment to drive Jira tickets from requirements analysis through completion.
- Maintained the team's Confluence knowledge base, centralizing technical documentation and team knowledge.

EDUCATION

University of Minnesota — Twin Cities

Bachelor of Science, Computer Science | May 2019 | GPA: 3.80
